

RECOMMENDED INSTALLATION

RHINO WET WASTE INTERCEPTOR

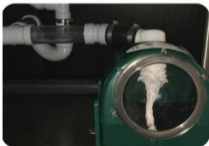

The Problem

- Grease traps are generally under-sized
- Oil, grease and solid organic material escape into drain pipes
- Blockages and bad odors occur
- Unblocking cost is a major financial burden to both food service operators and municipalities
- Municipalities spend millions to remove solids from wastewater

The RHINO Solution

- Traps 95% of SOLIDS at source
- Eliminates blockages
- Meets wastewater compliance standards
- Produces eco-friendly compost
- Produces recyclable/sellable grease
- Reduces FOGS
- Reduces grease trap maintenance
- Reduces grease trap odours
- Reduces need for larger grease traps
- Saves you Money
